PROFESSIONAL SUMMARY

Motivated Information Technology student currently studying at Belgium Campus iTversity with practical academic experience in C# programming, PowerShell scripting, and database development. Completed projects in system automation, IT infrastructure, Database design, and Ethical hacking. Passionate about technology and problem-solving, seeking an internship opportunity to apply technical skills, gain real-world experience, and contribute to a professional IT environment.

EDUCATION

Diploma in Information Technology
Belgium Campus iTversity

2024 - Present
Expected Date:
2027

Major: Information Technology

Related Coursework:

- PowerShell Scripting
- Cloud Computing
- Networking Fundamentals
- Project Management
- Database Management.

TECHNICAL SKILLS

Programming & Scripting

- C#
- PowerShell
- SQL (basic)
- HTML & CSS (basic)

Systems & Tools

- Windows Server 2019
- Active Directory
- Azure Active Directory
- Git & GitHub
- Docker (basic)

Concepts & Methodologies

- Cloud computing
- Networking
- Cybersecurity basics

- Agile / Scrum basics

SOFT SKILLS

- Problem-solving
- Time management
- Communication skills
- Team collaboration
- Willingness to learn

ACADEMIC PROJECTS

Automated System Monitoring and Reporting (PowerShell)

- Designed PowerShell scripts for recording the use of resources and system performance.
- For consistency, error handling and logging have been applied.
- Created reports for system analysis automatically.
- Made use of tools: Windows Server and PowerShell

C# Console Application Development

- Used C# to create interactive console applications.
- Logical processing, input validation, and menu-driven systems came into effect.
- To control program flow, loops, Enums, and collections were used.
- C# and .NET are the tools used.

Database Design and Implementation Project

- Developed and put into use a relational database system.
- Used SQL to create tables, relationships, and queries.
- Carried out data retrieval and manipulation tasks.
- SQL and Database Management Systems are the tools used.

Web Development Project

- Used HTML and CSS to create a simple responsive website.
- Well-organised websites with straightforward navigation and layout.
- Used formatting and styling to improve the user experience.
- HTML and CSS are the tools used.
